REMARKS

Technology Center 2100

Claim 19 has been amended to correct its dependency and to change "information" to --data--. There is no antecedent basis for "information" in either claim 1 or 18.

The rejection of claims 1, 2, 4, 5, 10, 12, 14-16 and 18 "under 35 U.S.C. 102(b) as being clearly anticipated by Snapp et al. U.S. 1003/0069693" is traversed. As is clearly evident from this application publication it has a publication date of April 10, 2003, some 20 months after Applicants' filing date of July 26, 2001. Thus, the rejection is clearly improper and must be withdrawn. As set forth in MPEP 901.04: "U.S. patent application publications are prior art under 35 U.S.C. 102(a) and 102(b) as of the publication date." [emphasis added]

The rejections, as set forth in paragraphs 5-10, of claims 3, 6-8, 9, 10, 13 and 19 as unpatentable over Snapp, et al., considered with another reference or "in view of Official Notice" are also traversed. As reliance on Snapp, et al. is improper, any rejection under Section 103(a) based on this reference is also improper and must be withdrawn.

Were the Sec. 102(b) rejection of claims 1, 2, 4, 5, 10, 12, 14-16 and 18 based on Snapp et al. appropriate because it had a filing date prior to Applicants' filing date, it would be traversed on technical grounds. Snapp et al. disclose a geographic pointing device that includes a GPS receiver, a digital compass and informational data bases. Please see the Abstract and paragraph [0015]. Please also see paragraph [0074], a summary of the only described embodiment. UP through paragraph [0077] there is no reference to "systems for tracking and positioning an entity or target." This is only referenced in paragraph [0078], and then only in general language. According to Snapp
